

EMS ISO9001 November 2017

EMS are pleased to announce we have recently regained our ISO9001 certification at our annual audit last Friday (10th November). **ISO 9001** is the international standard that specifies requirements for a quality management system (QMS).

EMS believe running and maintaining our quality system to the highest level allows us to consistently provide services that meet customer and regulatory requirements.

This standard is based on a number of quality management principles including a strong customer focus, the motivation and implication of top management, the process approach and continual improvement. These are principles which are very important to EMS and dictate our belief in excellence in service and client expectations.
